Contributions to Independent Organizations from Private Funds by 2-Year Election Cycle (\$millions)

Source: Center for Responsive Politics – special data release for AFR that includes all Private Funds (Private Equity + Hedge Funds). Contributions of \$200 or more from financial sector PACs, individuals, companies, and unions to independent organizations — Super PACs, Carey committees, and “dark money” organizations (politically-active 501(c)4 non-profits) — by July 7, 2021. These funds were then spent towards electing or defeating federal candidates independently of their campaigns.

In recent years, as the legal consequences for lobbyists who misreport their activities have grown more severe, the number of lobbyists officially registering has declined. The actual number is probably much higher. Research analysts and support staff are also not considered lobbyists. For more background on this topic, see the discussion above and these articles:
